Thanks Ginny. How about the pre-printed labels for the packs and for mailing? Were you all able to get these? Ginny I do not mind if the memo going to the sales force is in my name or someone else. It might make better business sense at this time because of time constraints that the memo, forms, labels, affidavit etc. all come from your place directly to John Hackett in MA. Then all we would need to know is that everything has been mailed. From that point on I could communicate with John as to the status of the pick-ups. Do you see any problem with this or does it need to go out from here?

Hi Liz. I was told last night that we need not sample Basic. I'm writing a memo to you with a few suggested inserts to your memo and another attachment in the form of an affidavit to be completed by the sales force members actually sampling.

I'll get everything to you before your 1PM meeting today.
